“We are in a new world, using old tools”
– Thomas Friedman, The World is Flat

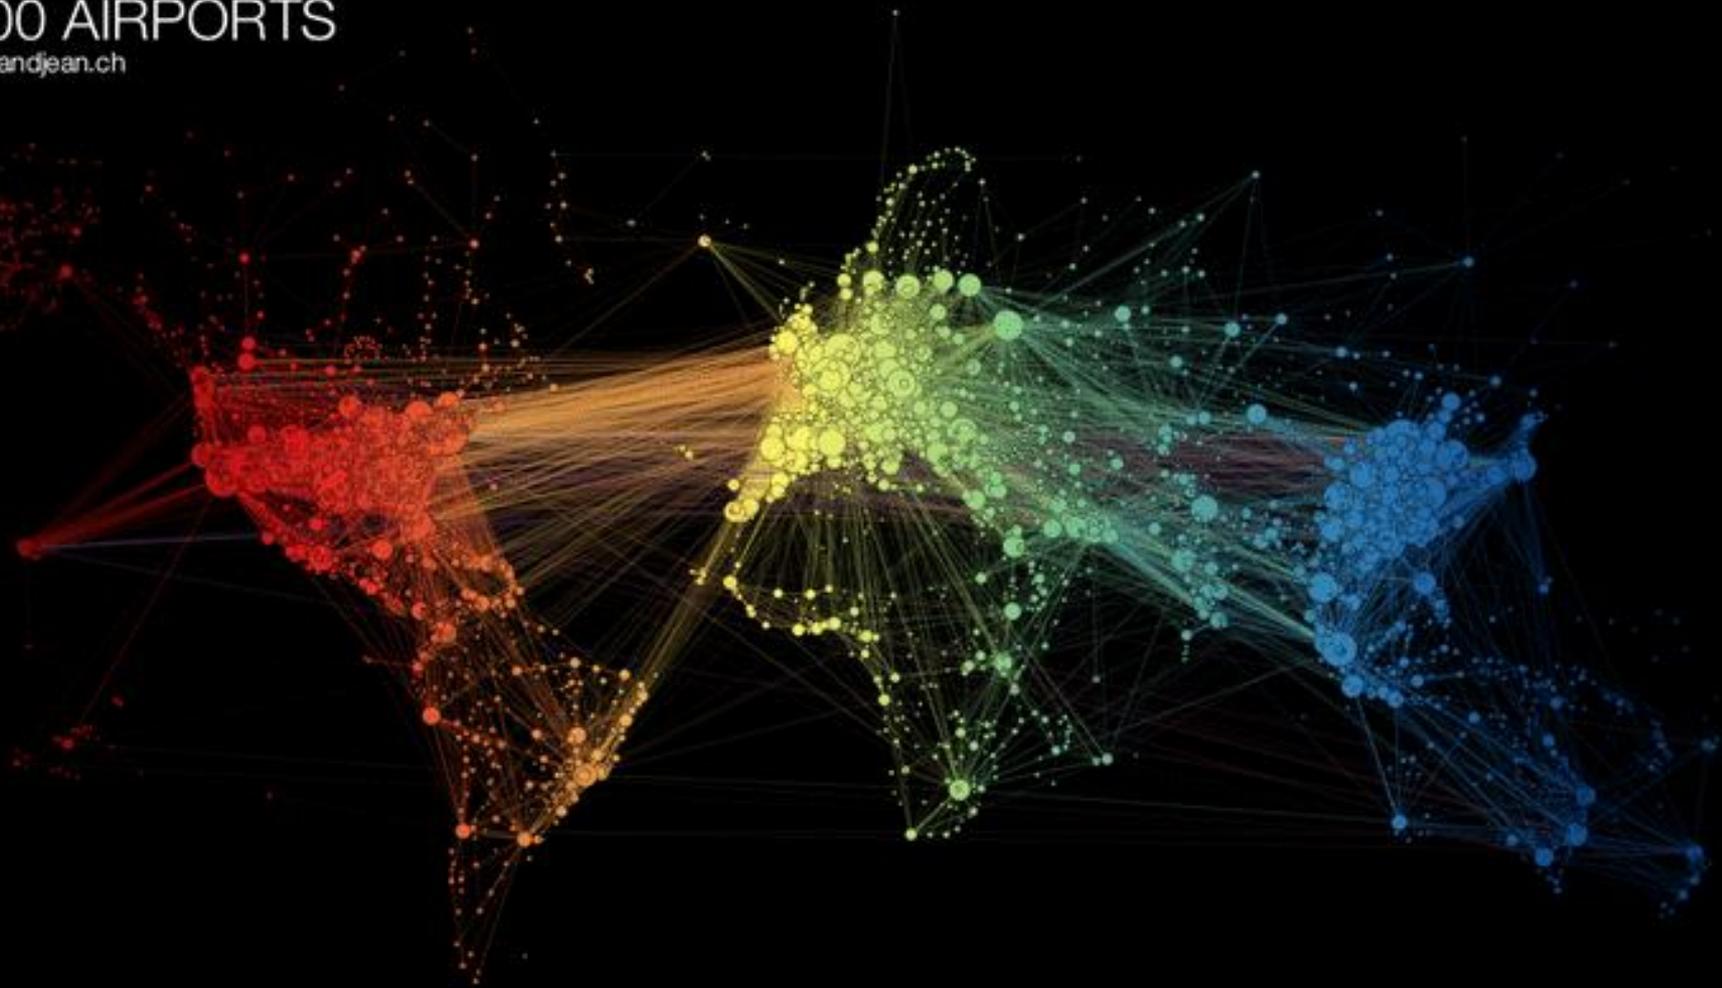

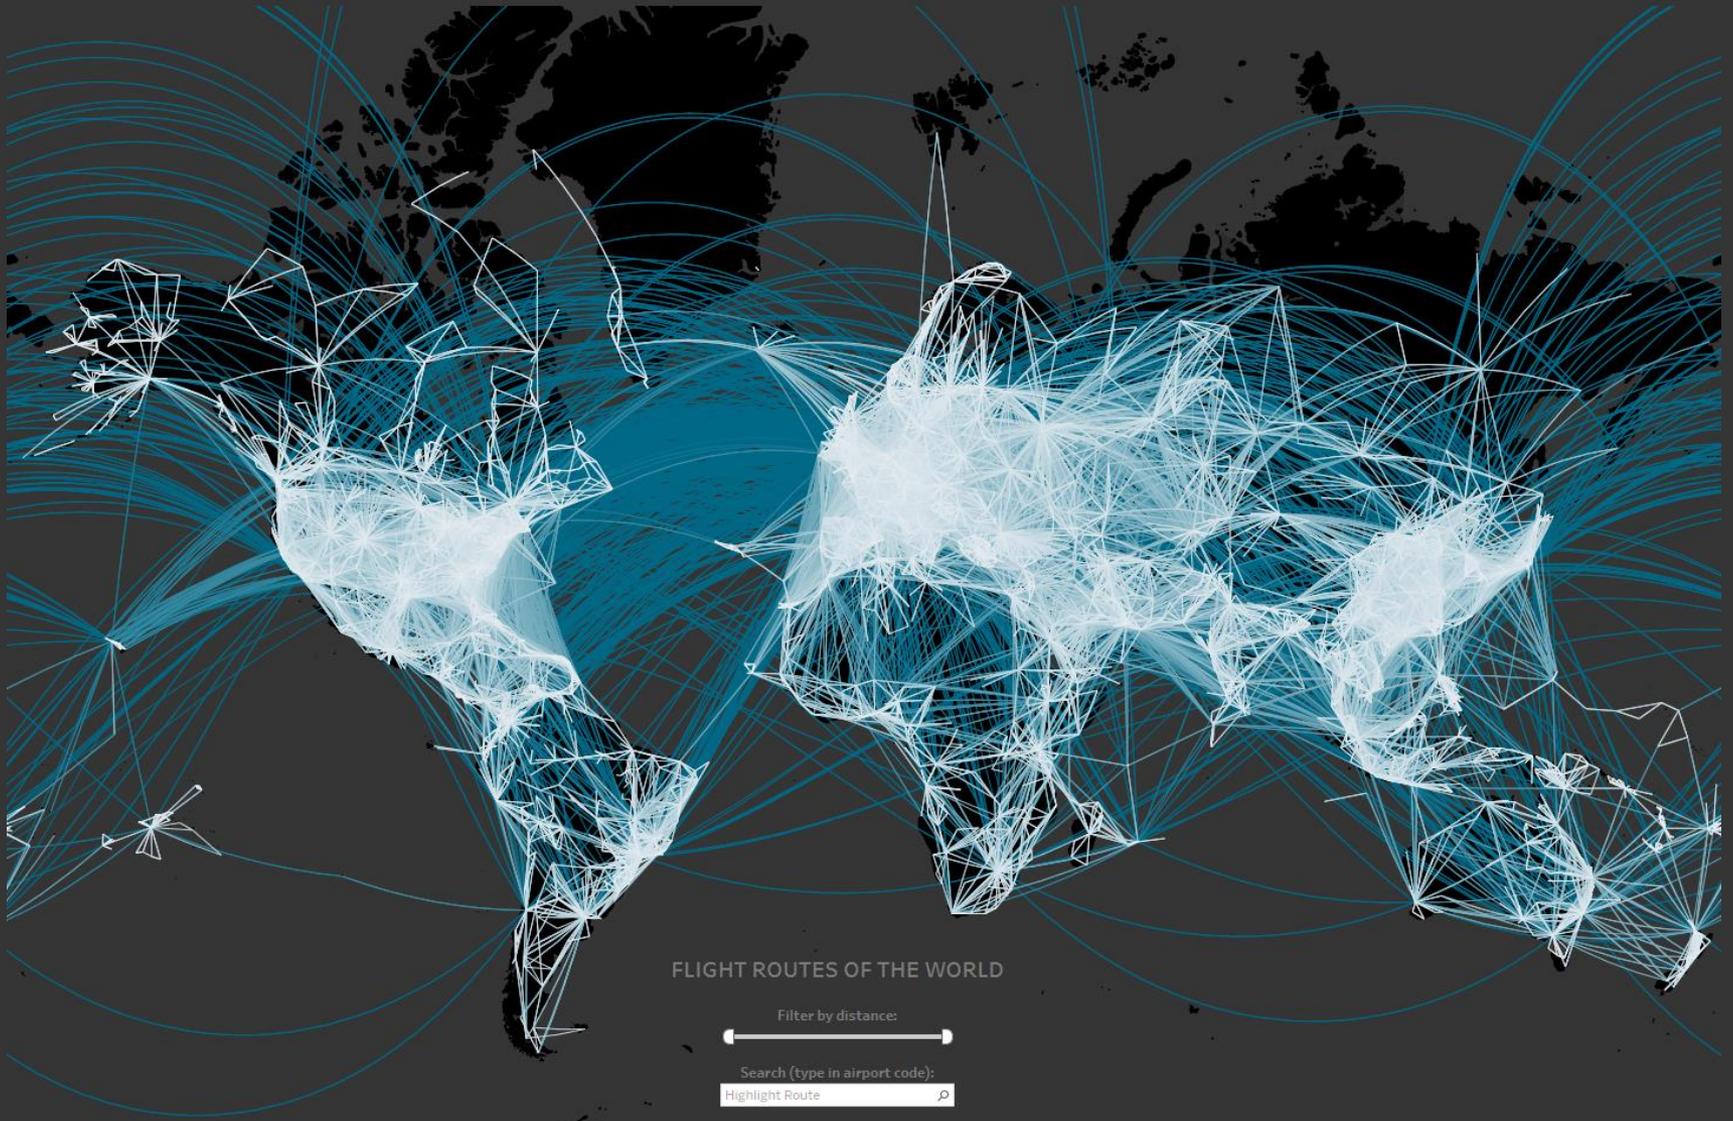

società liquida *loc. s./e f.* Concezione sociologica che considera l'esperienza individuale e le relazioni sociali segnate da caratteristiche e strutture che si vanno decomponendo e ricomponendo rapidamente, in modo vacillante e incerto, fluido e volatile. ◆
Il noto sociologo Zygmunt Bauman sostiene che viviamo in una «società liquida»

dromocrazia nozione attribuita a Paul Virilio, urbanista e saggista francese: "Questo termine ha una radice greca che unisce "dromo", la corsa/la velocità e "cratos" (ou "kratos"), una divinità che rappresenta la Potenza, il Potere, la Forza, il Vigore o la Solidità. Questo concetto ricopre la logica nella quale viviamo: il regno della corsa."

RÉINVENTER PARIS – EOLE EVANGILE

Parigi - Francia

2016

Un modèle d'urbanisme à la verticale pour un projet hybride où chaque plateau est appropriable par une large famille d'usages. Le triangle est connecté et partagé au service des parisiens grâce à la perméabilité de l'ilot.

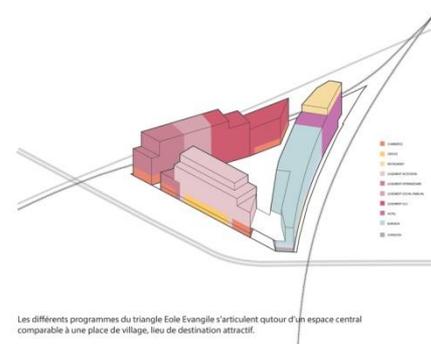

L'espace central du triangle, la place haute et le restaurant au sommet, des lieux attractifs pour les alentours.

Des espaces verts aux usages multiples: des jardins partagés en terrasse, une promenade ascendante végétalisée et un cœur d'ilot hybride appropriable.

La topographie construite par les côtés du triangle dessine une skyline en cohérence avec la course du soleil. Des panoramas parisiens s'offrent depuis les grands parcours aux sommets du triangle.

Les différents programmes du triangle Eole Evangile s'articulent autour d'un espace central comparable à une place de village, lieu de destination attractif.
